IONOSPHERIC DATA IN JAPAN FOR DECEMBER 1950

CONTENTS

	Page
Foreword	2
Site of the Ionospheric Stations	3
Remarks on Symbols	3
Ionospheric Data for Every Day and Hour at Wakkanai	4
Ionospheric Data for Every Day and Hour at Akita	15
Ionospheric Data for Every Day and Hour at Kokubunji	26
Ionospheric Data for Every Day and Hour at Yamagawa	38

P R E F A C E

The radio administration in Japan has hitherto been carried out by the Radio Regulatory Agency. With the reorganization of part of the government offices effective on June 1, 1950, the Radio Regulatory Commission was established and the work of researches on radio propagation has become to fall under the charge of the radio wave observatories, auxiliary organs of the Radio Regulatory Commission.

The radio wave observatories are composed of the Central Radio Wave Observatory located at Kokubunji, Tokyo, and five local radio wave observatories established at Wakkanai, Akita, Hiraiso, Inubo and Yamagawa respectively.

The Central Radio Wave Observatory has the following four sections : Ionospheric Propagation Section which shall carry on researches on ionosphere and wave propagation ;

Tropospheric Propagation Section which shall carry on researches on troposphere and wave propagation ;

Data Coordination Section which shall conduct the collection and arrangement of observational results, supply of operational data relating to radio propagation, preparation of radio propagation forecasts and radio disturbance warnings, and physical basic studies of wave propagation in general ; and

Administrative Section which shall conduct the general affairs of the observatory.

The ionospheric sounding is as heretofore being carried out by the four observatories at Wakkanai, Akita, Kokubunji (Tokyo) and Yamagawa.

This report provides the results of ionospheric sounding with symbols determined and in the form established on an international basis in the same way as followed by the Radio Regulatory Agency and it is hoped that it will make any contribution toward the progress in world-wide short wave communications.

This report is intended for distribution on request to the largest possible number of organizations concerned all over the world, and any and every information that the organizations concerned might forward to us in exchange therefor would be highly appreciated.

Uyeda Hiroyuki
Chief, Central Radio Wave Observatory,
Radio Regulatory Commission

January, 1951

SITE OF THE IONOSPHERIC STATIONS

Ionospheric observation is carried out at four stations in Japan.
The stations are situated as follows:

	longitude	latitude	site
Wakkanai	141° 41.1' E	45° 23.6' N	Wakkanai-shi, Hokkaido
Akita	140° 08.2' E	39° 43.5' N	Tegata Nishishin-machi, Akita-shi, Akita-ken
Kokubunji	139° 29.3' E	35° 42.4' N	Koganei-machi, Kitatama-gun, Tokyo- to
Yamagawa	130° 37.7' E	31° 12.5' N	Yamagawa-machi, Ibusuki-gun, Kago- shima-ken

REMARKS ON SYMBOLS

Except Zd, f_{\min} E and f_{\min} F, other symbols are used in accordance with recommendation of C.C.I.R. Zd, f_{\min} E and f_{\min} F in the table are defined as follows:

- Zd Half breadth of the layer, calculated by the method of Booker.
 f_{\min} E Minimum frequency, on which echo reflected from E-layer begins to appear by use of the observation equipment on routine work.
 f_{\min} F Minimum frequency, on which echo reflected from F-layer begins to appear by use of the observation equipment on routine work.
